

Attitudes to Water (A) Workshop Information Sheet

Thank you for joining this workshop about attitudes to water. The workshop will be led by Anastasia Badder, a Research Associate in the Faculty of Divinity at the University of Cambridge. It is organized by the University of Cambridge and Cambridge Water.

This workshop is part of the multi-partner project 'Water efficiency in faith and diverse communities'. The workshop will include:

- 1) A discussion of the project to date.
- 2) Sharing some examples of data collected during the project and thinking through them together.
- 3) Plenary discussion focused on a) if you come from a different worldview, what you would add to this discussion?, and b) do things we've said here resonate with you? How so?

If everyone is happy for this workshop to be audio recorded, we will do so using an electronic voice recorder. The recorder can be turned off at any time and the recording can be deleted upon request.

You are welcome to join/leave the workshop at any time at your convenience.

Our discussions in this workshop will be written up by Anastasia (the researcher). Your identity as a participant in today's workshop will not be disclosed as part of the outputs from the research, unless you specifically request this.

The write up and consent forms will be securely stored.

If you would like, we can share a copy of the write up with you. Additionally, if you wish, we can share any subsequent research outputs with you.

If you have any further questions or concerns, please do not hesitate to discuss them with Anastasia! You can also contact Anastasia later by email at the address below.

If you agree to take part, I will ask you to complete the consent form. Thank you very much for your time and help in making this study possible!

This project has received funding from the Ofwat Innovation Fund. The write up will be published on a University of Cambridge website. Data collected will be shared with project partners, including UK water companies, to the benefit of customers.
